

## Question & Answers

**Q: Does the ion cleanse belong to the Medical device?**

**A:** Ion cleanse doesn't belong to the medical device. It is a healthcare device. It is excellent for your health, diseases-prevention, anti-aging, beauty, slimming & resist sub-health & premature senility.

**Q: What is the harm of toxins in the body & why need detoxification?**

**A:** The human body is electric because our cells are electric. Disorders & diseases of the body have vibration frequencies that are incompatible with healthy cells. Toxins lower the immune system, i.e easy to catch a cold, lightheaded, increased heart rate, night sweat, insomnia, bad memory, limb numbness, allergies, fatigue, endocrine disorders, blood pressure problems etc.

**Q: Does everyone have the toxins?**

**A:** Yes. Everyone's body has the toxins in different degrees. The toxins come from the pollution from your environment, food & the waste from metabolism. The additives & pesticides left on food is also a source of the toxins. From the environment, the air pollution, electronic radiation, all kinds of chemical substance & heavy metals will be breathed into the body and produce harmful toxins.

**Q: How does one judge if there are toxins in the body?**

**A:** 1) Intestinal toxin build up causing bloated abdomen, halitosis, skin inflammation (Acne & pore blocking), insomnia & emaciation.  
2) Blood toxins disrupt blood flow. The blood sugar, fat & cholesterol accumulate on the blood vessel wall to form arteriosclerosis & unstable blood pressure etc. Too much acid in the blood cause the aches, gout & rheumatism etc.

**Q: Which factors impact the water colour?**

**A:** The toxin in the body has the main impact on the water colour but the water temperature, time & strength also have a little influence.

**Q: Why is the colour the same for most people?**

**A:** In today's live most people have the same living and dietetic habits which causes almost the same toxins if the conditions like water temperature, time and strength are the same.

**Q: Why do older people remove less toxins during a detox session?**

**A:** The stronger & healthier the person, the better the detoxification. This is mainly because the detoxification needs energy to remove toxins, with stronger persons the cells are healthy and they get rid of the toxins easier.

**Q: Why use salt in the water?**

**A:** The salt increases the conductive ability of the water, this adjusts the bodies BIO volume & gets the best detoxification effect. It increases the water Ion concentration, this fastens the movement of the ions, diminishing inflammation & sterilizers.

**Q: Is there any danger of getting an electric shock?**

**A:** No, the device has an automatic protection function. When the water current exceeds the security range, the machine will cut off automatically.

## CONTRA INDICATIONS FOR TREATMENTS
